Stocks and Bonds

New York, Feb. 2.—Extension of the upward movement in stocks was prevented today by a combination of bearish influences. The most disturbing factor was renewed selling of Rock Island securities, which became acutely weak. Last week's report that the company would be recognized was followed today by intimations that dividends might be suspended on the Chicago, Rock Island & Pacific stock, which is security for the Rock Island collateral 4s. Denial of this report lessened the volume of selling, which for a time was of unusually large proportions, but the stocks showed the lowest prices in the history of the company. The common dropped 3 3/4, 9 3/8, the preferred 4 5/8 to 14 1/2, the collateral 4s 2 7/8 to 45 1/2 and the refunding 4s 2 1/2 to 75 3/4. Partial recovery was effected later.

The effect on the general market was effective of selling here for European account. The silent feature was pressure against various investment stocks, among which American Telephone, Canadian Pacific and New York Central were conspicuous. Western Union sold off in sympathy with American Telephone, these shares being influenced by the postmaster general's recommendation in favor of government acquisition of the wire systems.

December reports of the higher eastern railroads were distinctly unfavorable.

With nothing in the way of bullish news to counteract the effect of these influences long traders were unable to bring about a resumption of the upturn of late last week.

Bonds were irregular. The market was little disturbed by liquidation of the Rock Island bonds. Total sales, par value, \$3,900,000.

New York Cotton

New York, Feb. 2.—Some liquidation of March contracts served to unsettle cotton today and after early advance prices eased off, with the close steady net 1 point higher on September, but generally unchanged to 2 points lower. March held its premium over May, but part of the near month selling seemed to come from leading trade interests and evidently promoted liquidation all along the line, although there appeared to be no change in the general character of the news. The New York revision committee is scheduled to meet after the close of business on Wednesday, to fix differences between grades, as applied to deliveries on local contracts for the remainder of the season and uncertainty in this respect may have been partly responsible for increased offerings of the near months.

The market opened steady at an advance of 2 to 5 points and sold about 7 points net higher during the early trading on the active old crop months. Relatively steady cables, bullish overnight spot advices from the south and favorable reports from the dry goods trade, probably helped this advance. Demand failed to broaden, however, and the market soon turned easier, closing within a point of the lowest. Private cables reported some continental buying of new crop positions in Liverpool and showed the market was quiet, but steady.

Spot cotton quiet; middling uplands, 12.75; gulf, 13.00. Sales, 100. Cotton futures closed yesterday:

New Orleans Cotton

New Orleans, Feb. 2.—Cotton advanced in the morning session today, going 8 points over Saturday's close, but in the afternoon fell off under dullness and closed at the lowest of the day, 2 to 3 points under Saturday's last quotations.

The buying of the early trading was in response to the bullish attitude of the Liverpool market, but the good weather over the belt attracted attention to reports of forward farm work and predictions of a large acreage this spring. Selling resulted which pared down the advance. Bulls were not aggressive on the advance and bears did not attempt to follow up the advantage they had in the afternoon. Lack of new features in the spot market was partly responsible for the dullness in futures.

Spot cotton steady, unchanged. Middling, 12 1/2-15. Sales, on the spot, 1,400; to arrive, 500.

Chicago Grain and Provisions

Chicago, Feb. 2.—Cold wave predictions, completed with absence of any snow safeguard in Nebraska, brought wheat buyers to the front today. Largely in consequence, the market had a strong finish at 3-8 to 5-8c net advance. Corn closed 1-1/4 off to 1-8c up, oats the same as Saturday night, and provisions down 2 1/2 to 5 to 7 1/2c.
